

Dear Harold Schmidt,

I am writing to you on the subject of the proposed fluoridation of our water supplies.

Firstly I would like to let you know that we have collected over a thousand signatures in our local area of people opposed to the fluoridation of water.

Without going into details of arguments against fluoridation I would merely like to point out that practically all of Europe has rejected fluoridation programmes and Belgium has even banned fluoride products.

A little research would now also show you that many towns in the U.S are now stopping fluoridation because of its ineffectiveness or dare I say harmful effects:

Yours sincerely,
