

This response was submitted to the consultation held by the Nuffield Council on Bioethics on *Public Health: ethical issues* between May and September 2006. The views expressed are solely those of the respondent(s) and not those of the Council.

12 -  
You say on p 35) You also say there  
that F-like effects are mainly cosmetic.  
No! NOT SO! As I have practical (Nut-  
rition) in the fluoridated H<sub>2</sub>O of Eng-  
land I have seen many cases with  
Joint-pain from skeletal fluorosis  
clear up in 2-3 months with 9mg Bo-  
ron a day! Boron forms a water-soluble  
ble compound with the fluoridation and  
so that is carried out of the body.

If you are low on Boron fluorida-  
tion makes that worse. The parathyroid  
gland, the body's most Boron-rich gland,  
suffers. I must take 6mg B/day to keep  
my parathyroid-level balanced; 5  
other hormones also go out of balance  
with that, all balance out with 6mg B/day.

You furthermore say that a child-  
ren profit most by fluoridation! But  
several publications, esp. one in 1984,  
report lowered IQ in children in  
fluoridated areas. There has been  
at least one death after fluoride pan-  
ning of a child, teeth or not?

-3-

There are many papers showing the  
bad influence of fluoride on  
the thyroid. As for the <sup>bone</sup> osteo-  
some, several surveys found that  
this rare cancer is <sup>3-4x</sup>  
<sub>SE BOS (25A) IS PCHN 57 17</sub>  
more common with fluoridation!

New Zealand dentist, John Colgate  
from, first believed in fluoridation  
but then he checked very many  
dentists' publications and found  
that one quite systematically  
had counted only big cavities in  
fluoridated areas but all big  
and small, in non-fluoridated  
regions!! He then became as ANZ  
as Lincoln. Canada's top dentist!  
So great is the dentists' need for face  
saving after all these toothpaste  
and mouth wash recommendations!

This fluoridation craze seems  
to be driven partly by the need for  
cheap waste disposal and partly

Do you stand in favour of curbing the rights of patients?  
ASAP!

~~by~~ a long-standing ~~trans~~ ~~over~~ ~~of~~ ~~the~~ ~~Manhattan~~ ~~Project~~ ~~with-~~  
less propaganda to make F. H. C. ~~probable!~~ They bought up Rochester H.Y. University and the ~~Com~~ ~~mission~~ ~~ers~~ supervised the first F. H. C. ~~to~~ ~~open~~ ~~up~~ ~~in~~ ~~Sweden~~ ~~and~~ ~~there~~ ~~the~~ ~~North-~~ ~~European~~ ~~sculpture~~ ~~is~~ ~~not~~ ~~seen~~ ~~in~~ ~~THE~~ ~~ENGLISH-SPEAKING~~ ~~con-~~ ~~tries~~ ~~which~~ ~~were~~ ~~under~~ ~~that~~ ~~propaganda~~ ~~in~~ ~~the~~ ~~1940-ies~~ ~~it~~ ~~and~~ ~~still~~ ~~feel~~ ~~it~~ ~~!!!~~

Of course, FORCED MEDICATION OF WHOLE POPULATIONS is HIGHLY UNETHICAL, AS YOU KNOW! Also it has become clear <sup>in spite of the fact that</sup> that 90% of UK's population would vote NO! in a referendum! But AS DORIAN O'LEVER, UNIV. OF TORONTO, who was not allowed to report deaths with a drug she was researching on a drug he just said: "Tony would 10% matter, all the others can be forgotten!" How is it then? SO MANY CURES ARE HIDDEN FROM US BY THE NHS! I know of many! Yours faithfully C McFarlane

TO ASSISTANT DIRECTOR OF THE  
NUFFIELD COUNCIL OF BIOETHICS  
MR HARALD SCHMIDT,

THANK YOU FOR YOUR LETTER OF  
18.7.06. OF COURSE, YOU ALREADY HAVE  
MY ADDRESS BUT I NOW GIVE IT TO YOU  
AGAIN TO GET YOUR CONSULTATION PAPER  
IN 2007. — AS A SWEDEN I SEE THESE  
WILD PRO-F EFFORTS AS A MADNESS WHICH  
DOES NOT FIT WITH SCIENTIFIC EVIDENCE WHICH  
OTHER NORTH-EUROPEAN NATIONS LONG HAVE  
BEEN ACTING ON IN A LESS CONFUSED DISCUSSION  
CLIMATE! IT IS REALLY A LOCAL SCIENTIFIC  
PROBLEM, NOT A BIOETHIC ONE MAINLY! F DISTURBS  
<sup>SOME #3</sup> BODY ENZYMES FOR A START!  
HERE ONLY THE POOR CAN NOT AFFORD  
EFFECTIVE WATER FILTERS AND BORDON TABLETS!  
AS USUAL, THE DEVIL TAKES THE HINDMOST!  
AN ETERNAL BIO-ETHICAL PROBLEM!

SINCERELY,

Christina McFarlane

P.T.O

-2-

What makes this F.- discussion even more ridiculous and medieval is that there is no mention of XYLITOL \*.  
the caries-reducing birch-sugar in general use in Scandinavia for 30yrs! It <sup>MENDS</sup> ~~meads~~ incipient cavities! I stopped my sons caries altogether for some years in his mid-teens with ca 5% Xylitol in his tea sugar! It works! Xylitol is in many sweets and chewing-gums in Sweden. Prof Mäkinen in Abo (TURKU) in Finland did <sup>needed</sup> all research 30yrs ago! When in ca 1985 I tried to get Tate and Lyle to carry a sugar with 5% Xylitol they told me "No there is a dentists' lobby"!!! So much for dentists caring really! This is more a case of BIO-STUPIDITY than Bioethics is it not! As XYLITOL <sup>in 2006</sup> now is here in UK to stay is it not your job ethically to promote this safe and GI-Low food? Instead of mucking around with scandalous moral and intellectual hang-overs from the 1940-ies bomb making era! Brocken your views a bit more, perhaps? AMF.
