

This response was submitted to the call for evidence by the Nuffield Council on Bioethics on *Emerging techniques to prevent inherited mitochondrial disorders: ethical issues* between January 2012 and February 2012. The views expressed are solely those of the respondent(s) and not those of the Council.

Carol Gordon

In response to your letter dated 8th February concerning the above. I have no concerns or problems regarding research of any kind for this disorder.

Any procedure to help prevent this from happening can only be a good thing.

Regards

Carol Gordon.
